

Let a Dumb Little Sioux Boy from the plains of South Dakota close with this concept.

Every student of CALCULUS, TRIGONOMETRY, and ELECTRICAL ENGINEERING knows about this mathematical Concept, yet not one has the nerve to bring it forth. Not even EINSTEIN would present it in the method that questions the misfit to the speed of LIGHT.

In Institutions of Higher Learning, it is avoided by a debate-
ARE DIFFERENT COLOR WAVES LIGHT?

This is maybe the one debate that could be finalized and answered by another question, which would make a debate to this question kind of stupid.

IF ONE WAS ABLE TO FIND AN OBJECT IN ABSOLUTE SPACE, WOULD IT BE INVISIBLE TO THE HUMAN EYE BECAUSE IT HAD NO COLOR?

IF IT WAS INVISIBLE DUE TO THE LACK OF COLOR, HOW WAS IT FOUND OR LOCATED IN ABSOLUTE SPACE?

DOESN'T THE WHITE MAN FIRST LOCATE SOME TYPE OF WAVE SO VELOCITY CAN BE CALCULATED?

I stated there would be only one(!) question and I've given three(3) and by using tribal concepts, these questions could continue on into infinity.

However, it can^{be} finalized by one conclusion.

The White Man and his sciences has components that isolates a Wave alone or makes a substance from which he calculates a finding.

This finding becomes part of his Pure science which he puts together by an assumption he calls a THEORY, because he has no components that can measure or calculate a Pure Science..

On the subject to the theory on the SPEED OF LIGHT, he forgot to mention a small problem.

The human eye which begins to see colors around 68,820 miles per second and can see the complete spectrum around 119,040 miles per second.

You would be surprise at the speed of the color WHITE.

This Scientist was able to locate the speed of ULTRAVIOLET by the use of photocells, which he will admit is not considered LIGHT.

Now these photocells have isolated ULTRAVIOLET up to the speed of 169,260 miles per second which the human eye cannot see but it stops here.

From 169,260 to 186,000 miles per second, which the human eye cannot see and no component is in existence that could calculate this theory existence, lays a small problem which could give the reason for the
