

~~T H E H E A V E N L Y J O U R N E Y~~

Bear Clan members should know one important fact about their beginning existence.

Any Antiquity and Anthropologist scientist ~~knows the original BEAR CLAN members and other tribal members came from another Solar System.~~

One of these considerations is a Planet or Star called: ~~ARCTURUS~~ which is the clear and brightest star in the constellation of Boötes.

~~The tribal domain of the BEAR CLAN is "celestial" according to the teachings of the civilized white man.~~

Now according to Anthropology and Indian Legends, there are two major constellations in the northern hemisphere, ~~URSA MAJOR and URSA MINOR~~ which are called: ~~THE GREAT BEAR.~~

There are ~~seven(7)~~ stars in both and the brightest is in ~~URSA MINOR~~, called ~~ALPHA URSAE MINORIS~~, what we call ~~THE POLE STAR~~, or ~~POIARIS~~ found in the north to which the Earth points its axis.

The first two stars in ~~URSA MAJOR~~, ~~ALPHA~~ and ~~BETA~~, directs one to the ~~POLE STAR.~~

The Hindus called them ~~"THE SEVEN WISEMEN.~~ In Sanskrit it is written as ~~BRIGHT.~~ It is the Greek word ~~ARKTOS~~ that identifies it as ~~THE GREAT BEAR.~~

The traditional Symbols for the ~~GREAT BEAR~~ include the ~~CROSS~~ and ~~SWASTIKA~~ for the four powers, the four seasons, the four quarters, and the four directions. The Plain Indians teach that the points to the traditional ~~CROSS~~ and ~~SWASTIKA~~ are ~~White, Red, Grey, and Black.~~

Major civilized Antiquity Scientist knew Indians from the old teachings could name the seven Planets and there are ~~7~~ Planets in ~~URSA MAJOR.~~

The Iroquois Confederacy were the last in the 1700's to teach, when the stars above the ~~GREAT BEAR~~ appear, it was time for the Spring Ritual for the returning of the Robin, Chickadees, Canada Jay, Pigeons, Blue Jay, The Horned Owl, and the Small Owl.

~~When four of these stars disappeared, it was time for the Autumn Ritual for the birds that migrated.~~

existence.

in the north to which the Earth points its axis.
