

of Astrology so popular.

There is however, two schools of thought among the scholars or scientist of the subject:

- (1) A good Astrologer can make successful predictions,
- (2) The prediction of events are its weakest side to the science.

The subject of Astrology in the civilized world has many forms and applications. In other words there are many methods in approaching the ART or SCIENCE or BELIEF of Astrology. The order of importance is governed by the time and country.

The many forms are as far as I can comprehend:

NATURAL ASTROLOGY. which foretells the motion of the Stars and Planets in the Universe. This has now become the science of Astronomy.

JUDICIAL ASTROLOGY. deals with the interpretation of these motions in terms of terrestrial life.

GENETHLIACOL ASTROLOGY. The art of erecting and interpreting an individual's horoscopes.

MUNDANE ASTROLOGY. Concerns only with the future of a state or nation or a King as head of a state or nation.

HORARY ASTROLOGY. Answering questions by making horoscopic calculations for the moment an Isolated event will happen.

MEDICAL ASTROLOGY. There are Doctors of Medicine who use their medicine knowledge along with the medicine found in the 12 signs of the Zodiac.

ELECTIONAL ASTROLOGY. Horoscopically choosing exactly the right moment for an enterprise.

PHYSOGNOMICAL ASTROLOGY. Taking facial characteristics and show how their Creation is connected to the Star's influence.

This information did not come easy and if one was to use the contents on every book written on civilized astrology, a person would be old before their time. I found the Books: ASTROLOGY, by MacNeice and THE COFFEE TABLE BOOK OF ASTROLOGY, by and Edited by John Lynch.
