

Isolated and Introduced with a known toxic chemical that the Plant now reproduces with the chemical intact.

To use this product causes mental and physical breakdowns to everyday life. Keep in mind that it is earmarked for Indians only and protected by Governmental Executive Orders.

But this shipment that the TIME WALKER is riding and hiding on, is only one of several thousand that make this journey to delivery to Indians in the United States. This product when distributed has a mark up of 10 fold, so 300 million dollars now becomes 3 Billion dollars.

This shipment alone would give every man, woman, and child living on reservations \$12,000. apiece of this product and if they received 10 such shipments a year instead of a thousand- this would come to \$120,000 dollars. The product has a certain favor to the American Public which would make the American Indian the richest in the world by reselling it to the American Public, but no rich Indians can be found today.

Any type of survey would show that only 2 to 3 Indians off every reservation are permitted to distributed the product at a small limited basis that the TIME WALKER can prove.

So, this shipment represents a many fold problem to the Indian that they are not aware of:

- (1) These shipments cost money which are taken from tribal revenues.
- (2) Less than .0001% of the product is received by the Indian so someone is stealing Indian treaty stipulated products.
- (3) The product was produced to cause poisoning of the body.

Unlike Mexico way down to Peru, the Indian receives the finest grown and distributed.

Why does the United States whose original plan was to poison the Indian to death, is permitting 60% of the American Public to be poisoned?

now reproduces with the chemical intact. .
