Dear Madam,

You do not know me nor I, you. Nor Am I a descendant of the historical ship, MAYFLOWER.

I am an American Indian from the Dakota(Sioux) nations.

To openly tell you the reason for this letter directly, would sound stupid and out of place, and I could lose a much needed contact for Information I seek, on a quest my Indian Grandmother sent me on, along time ago, which is more years then I care to remember.

However, in the search for the truth of this quest, events and historical references end at a place in history, identifing certain people that were part of these events(that Historians using every possible means at their disposal, erasing the true facts) that ended by contact with the American Indians, that these people have no knowledge to.

One could ask, "WHAT DOES THE AMERICAN INDIAN KNOW ABOUT SUCH KNOWN HISTORICAL EVENTS OUTSIDE OF ACADEMIC TEACHINGS?"

This same question can be asked by an American Indian- WHAT DOES THE AVERAGE PERSON,KNOW ABOUT THEIR EXISTENCE AND LEGAL RIGHTS THAT ARE DIRECTLY TIED TO AMERICAN INDIAN TREATIES?"

In the beginning of my personal involvement in an event, march 11,1972 which was a occupation of a Mission by other Indians and myself just South of San Fransico, it appeared that it would never come to the time in History, I would be writting to someone that is a descendant of the MAYFLOWER. (Los Angeles newspapers wrote on the event. a reporter from the old Herald Examiner wrote on the event and me if you care to check any references for the event).

The conclusion one gets from Newspaper reporting, is nothing more than abunch of crazy Indians. It is meant to separate the Intellect from the Senile.

But I was the author of the INDIAN MANIFESTO that was used in the occupation of this Mission, which technically disolved International boundr lines of Nations in North and South America, which was true and correct under this concept.
