

I can prove that Columbus did not discovery the Americas and that he had the exact maps and charts to come to the America's to start a trade route and these maps and charts came from a nation that had signed treaties with Indian tribes of the America's long before 1492A.D.

I can prove that Columbus was not born Italy as many believe and that he was not born in Spain as spanish historians through a new singing Opera, try to make one believe. That he was born In Lisbon, Portugal and it took three documents filed with the International Court in Hague to, take the right of starting a trade route with the Indians away from Portugal and giving it to Spain, in exchange, Portugal was to receive the the Territory to the lost Continent of ATLANTIS.

All of this research directs the strong possibility that the nation that sign treaties with Indian tribes of the America's before 1492A.D. was the alleged Empire of Egypt or KAM. That there are treaties in one of the State's archives that proves this out and there are Indians today that can still write, read, and speak this ancient language that these treaties were written in.

I and well as the civilized world has been taught through Institutions of Learning that the America's is the new world, yet American Antiquist and archealogist through scientific tests, know the America's are the old world with the land of Egyptians as the new world by being at least 2,600 yesr younger.

I can go you one better then that. But keep in mind that I'm no more then a little dumb Sioux Boy from the Plains of South Dakota but able to retain alittle what has crossed my path.

For what I'm about to proclaim, some might even dispise and hate the ground I stand on but it is an idea or concept with archealogy finds as the references, that cannot be bypassed or overlooked.
