

To put everyone at ease, bring your best ancient language translators but make room for an aboriginal who was taught by his parents to write in his tribal language, so he is able to read to small degree, what has been written because the method is a tribal system.

On some of my many journeys in the past 20 years, on August 28, 1984 while traveling in Old Mexico, i discovered just a few miles north of Mexico City, a new archeaology find that was being dug up.

Hanging from a rope because army officials didn't want anyone to close to this new digging, I saw and read the details of a marriage of two young people from two different cultures, who were being wished "Bon Voyage" by the whole tribe on a special journey.

It told of a young American Indian Girl who had married a young foreigner that been taught by special instructions, the 28 sciences or ways or paths, who were to leave on this journey to KAM, to build by these sciences, THE GREAT LAW and the place they were to do this, was the Valley of the TIMEWALKERS.

To me, THE GREAT LAW, when translated to the civilized concept or intellectual ideas, is what you have named THE PYRAMIDS. WHICH WHEN COMBINED WITH WHAT YOU CALL THE CAPSTONE, and what we call the TOY, is the mathematical formulas and equations to the LAW ON INFINITY.

With what little research I've done because I'm an Indian Activist and not a scholar, it could be considered nothing when compared to what you may have, but I have one advantage! I know the tribal rituals and the teaching- concept to such an undertaking. I can state in which I can stand to be corrected, within a one mile diameter of a certain location, having never been there myself in the physical form, I have a pretty good idea, where this young couple set-up shop in KAM.
