

## A NEW WORLD

If one considers, an individual starting a new life, in a strange lifestyle and a language that is not understood and was never told that your language would never be spoken again, as a small child, it would be a frightening experience.

To later learn that you could not and your parents could not make contact with you while attending this strange place, no psychiatrist or Doctor Counciler has on record, the degree of loneliness experienced.

However, one can remember the first words that identified your existence at this strange place. Even though the meaning of the words were not known one assumed they identified your tribe and its name.

YOU HEATHEN! YOU PAGAN! YOU ATHEIST!

It was later learned, the people that identified you by these words, were Teachers with Educational Credentials. The Credentials were U.S. Government, which is a little higher than State Credentials.

Twenty years would pass before one could understand what was said by these names. Thirty years would pass, where one reviewed all White Man's Religious Places and discovered that few had the first religious experience of coming into the reality, that there is a CREATOR. If one called this Supreme Being, GOD, LORD, ALLEAH, SHINTO, or BUDDA, all could sit down and discuss their spiritual experiences and knew this one entity could not be separated by a name or a religion, because there was only one..
