

These two concepts are the most important to being an Ancient in planning everyday activities. WHY? because in the calculations to tribal and clan equations, one must review the calculations to percentage ratio differences that appear in subjects or citizens of nations or countries that do not believe in the Ancient and Traditional way.

EXAMPLE! The human generation in spiritual views, is in perfection individually having a cycle- every 2 days, 4 hours, and 30 minutes; as the citizens collectively of a nation or country, every 201 days and 2 hours.

- a. Should the percentage ratio fall below this for the people of nation or country, then it is nation of War, Destruction, and Lust replacing Beauty and Love.
- b. Should the percentage ratio be above the human generation and just below the Speed of Time(light), then it is a nation of War, Intellect, Oratory, Music, and remarkable men and women of genius.
- c. Should the percentage ratio be above the Speed of Time(light) then- it is a nation where the people have many Gods, Lords, Saviors, and Witchcraft Idols, all having superstition laws to rites and ceremonies that conclude to sexualism as the perfect state.

One only has to look and review the civilized concept on Bio-rhythm which is alleged to determine your personal Physical, Emotional, and Intellectual cycles. No one can blame an Ancient for such obvious rituals that places individuals for open spiritual scrutiny by peers, because Ancients warned of such stages, who were killed and murdered for doing so.

Now the overall determination on how peaceful or violent the citizens of a nation or country will be using the Ancient mathematical system and its method or rules, can be applied to the peoples or citizens of a nation or country seeking a spiritual society. One must first separate Spiritual Light from Ancient Wisdom, just as knowledge and wisdom are separated.
