

so the Rite, is to SING to have the Vision. Then experiences and travel recall another event.

In the country of Mexico. The city of Puebla, the Chalula Temple, August 24, 1984. Legends had it that the Indians covered this Temple to escape the Soldiers of Spain.

You can take a tour through this mound of dirt, which is suppose to have 5 miles of underground tunnels, which show this Temple at different levels.

Again we have a Cathedral built right on top of this Ancient Temple. However, the back of this mound of dirt has been dug out that shows the Temple that still stands. The legends are questionable because one can see the Ancient Temple Blocks built right into the walls of Cathedral that sits at the top of this mound of dirt. It cannot be missed.

But on the Temple walls, its clearly written, Indians practiced there Songs and Dances done in a set manner, which was heard by the CREATOR, GREAT SPIRIT at a given TIME and there was a phenomenon as the sign the Song and Dance were seen and heard by the GREATOR, GREAT SPIRIT.

One only has to use their personal logic to reason this idea. If one was to alter it, it could only give the Ancient Indian credit for Astronomic Construction Knowledge.

The Puebla Chalula Temple which has been covered with dirt is about a quarter of mile square. It is a good 300 to 400 feet high with a Catholic Church built on top of it. Three sides of this Mound are so steep only a good mountain climber would make it up, while side one you can walk up to the Church but it is hard walk.

The question which is an engineering problem, how long would take a modern day company to make a steep hill like this? I know personally if one hundred Earth Movers were there, it could be done in a day if they could climb the steep incline which they can't, so that's out.

Remember the Indians were on the run and they covered a temple a quarter of a mile square 300 feet high. If you believe that, you'll believe anything. If that was me running that machine, one scoop and I would have covered all the spanish soldiers coming after me.
