

But what has all this to do with The CIBOLA GROUP?

Because these congressional acts created five(5) United States Congressional Villeges. One of these Villeges is SALAMANCA, NEW YORK. If one was to leave this Villege by train, of two leaving going to the Buffalo Creek Indian Reservation, one is owned by a CIBOLA GROUP.

After arriving at the Buffalo Creek Indian Reservation, you find another city created by the CIBOLA GROUP. Buffalo, New York.

Any white man can tell you in this area, that there is a tunnel from this area into Canada. Another from here to SALAMANCA and on down into Pennsylvania, because the Indians talk about it freely.

The question to be asked: Is it a search for a Golden City or the beginning of a Migration Trail?

Where did the CIBOLA GROUP get the foundation for the monies spent and cities created which they care little for, that keeps them looking on?

From personal knowledge and research, only one Indian Society teaches that on a Migration, no one is to worry about food or shelter. That the power or energies of a Migration or Ice Age, will light certain underground villeges like that of villege in sand or light brown. These Villeges have been created since the beginning of time and will be protected by the CREATOR, GREAT SPIRIT. But you/^{will}still have to know the times of tribal and Serpent equations which will give the times these Villeges will light up to be seen.

Only one society teaches this from personal knowledge.

So the CIBOLA GROUP are not looking for the actual Migration Trail but the resting place in a Migration without paying the dues.
