

Scientifically and accredited conclusions- as an Indian that has some idea to the knowledge that has researched the documentation, I personally could take my family and make a safe journey throught the coming Global Catastrophe that will end as an Ice Age.

BUT! Some Indian tribes have songs and dances that describe the conditions of such a Global Catastrophe. One such song, is the one that tells of the Shark that shows Indians leaving the Continent of MU which is undergoing a Catastrophe, where to go to be safe.

Any normal person takes the story as legend, but to the Indian it is a clue that makes the story, as a way to a solution.

THE SHARK, which has no prejudices, no hates, no likes or dislikes, no malice and doesn't know how/^{to}choose anyone's side would then escape any type of pains; would be pure in heart. It would have the right to be a TIME FISH. It would have the right to escape the Catastrophe. SHARKS as a community, have a ritual in which they swim in a circle. Civilized people hate to give any creature credit for having any type of knowledge or intelligence. Tribal Clan Teachings have a language spoken by humans that sets up a communication system between humans and certain animals.

To now include the SHARK plus everything ever written about the Indian of the America's, plus what has been presented so far, all combined- we have still omitted THE VERO and MELBOURNE MAN, a Archeaology find.

In fact, THE VERO and MELBOURNE MAN has been omitted from all sciences of Antiquity, Anthropology, Archeaology, and Geology. WHY? Because the Indian of the America's has not changed in body structure and lifestyles since the beginning of TIME. The Indian cannot be included in DARWIN'S THEORY OF EVOLUTION.

As an Indian of the America's, a descendant of the Ancients, must take a long look at THE VERO and MELBOURNE MAN, not because they were petrified Indians but because it answered unknowns and brought me back

idea to the knowledge that has researched the documentation, I personally could take my family and make a safe journey through the coming Global Catastrophe that will end as an Ice Age.
