

to the tribal rituals for conclusions and solutions.

THE VERO and MELBOURNE MAN were petrified Indians who escaped out of the nation of Atlantis because there was a Global Catastrophe taking place in the world. Because of evidence, I must assume that they went on the same bases that has been presented so far in this book. Plenty of scientific translations and writings, and evidence but they were still caught in the catastrophe. They had set up their lifestyle and could be recognized as a tribe and nation. They were found among Dinosaurs, all the same age, petrified. They did not fulfill the promise that was given them. To live by tribal equations, know how to synchronize time, they would have safely made it through this catastrophe. But there was still Dinosaurs on Earth which were the last to be destroyed in such a catastrophe so all this non-Indian knowledge could not tell them the ending of this catastrophe because there never has been a survivor using this knowledge of the White or civilized Man.

There is another such example taken from Archeology finds (The Geology of China, Lee(1939).) on two(2) Ice Ages back. Near Peking in the Village of Choukoutien-found in caverns and fissures of rocks; again extinct animals with the body remains of a European, a Melanesian, and an Eskimo type in one close-knit group in a Cave. Remarkable! Because three different races could be identified. Three individuals with different cultural backgrounds teamed together trying to overcome the global catastrophe. Anyone can easily assume they combined their knowledges but because there has never been a survivor using the present-day knowledge of that day, evidence on the end of such a catastrophe, was unknown. All this on a Chinese hillside.

But getting back to all this Scientific Translations, Writings, and Evidence. All precise with very little room for debates, except for one fact that could only be known <sup>by</sup> an Ancient.
