

Before one can put together an Astrology Chart that the Indian of the America's did use, note that it is a phrase "did use", one must first put together THE SOURCE which it came from, so any Astrology system has a beginning.

As stated before we have only one source of information to go by because of the destruction of Ancient cultures. The fact that I as a small child attended a last ritual that was destroyed by South Dakota National Guardsmen and state police, I have a date to double check calculations in putting together this SOURCE.

The civilized system used today, had its beginning put together by Julius Caesar, but Caesar constructed it from an Ancient Source called: THE CALI YUG.

I'm making reference to THE JULIAN CALENDAR. Originally this calendar had names for certain numbered days on the calendar that is that dead-give away, that it came from an Ancient source of keeping track of time.

REMEMBER! The Julian did not have the months of July and August and what the names of these months were, I have been unable to find the references. These two names would further provide correct signs to be placed on any Astrology Chart.

Originally, all Astrology Charts had 20 signs and not the 12 that are used today. But one present-day Astrology Sign also gives an Ancient the conclusion that it came from an Ancient system.

✓ CAPRICORN. The sign of the Goat. The civilized concept would name this the Goat because it is also the sign of the Matriarch Society or the WOMAN OF THE CLAN or CLAN MOTHERS with their CLANS.

There are others, but this one is brought to light because of its place on the one used today.
