But getting back to ODIUS or ODE and an Ancient Calendar
By Ancient calculations one ODE or expression was the TIME diameter
for a Calendar.

The civilized scientist put it together as follows:

ODE= a diameter for time 11 days
referenced as the LAW OF NATURE.
3 ODES= one generation of 33 days.
11 Generations= The Seasons or Tuff 363 days.
plus: Sun that stands still at the
north and south lines $\frac{2\frac{1}{2} \text{ days}}{365\frac{1}{4} \text{ days}}$.

Let me show you how it should have been translated.

$180 \frac{1}{12}$ atoms x 12 days = 2160 (which is the first table of the 200)
(tables of the WINTER TABLES or TIMES)
(OF THE BEAST or SATAN'S TABLES. What)
(the Sioux call THE WINTER COUNT.)

You already know that $180 \frac{1}{12}$ atoms is 23.867405 hours in TIME

$23.867405 \times 12 = 286.40886$ hours or 11.933702 days in TIME.

So, the Ancient figure of 2160 atoms is the same as 11.933702 days
and that one complete WINTER COUNT is 6.5347031 years in TIME only.

One ODE = 11.933702 days
3 ODES = 35.801106 days
11 Gener. = 393.81216 days
plus 3.97798 days the SUN stood still at the north and south
lines
equals $\frac{397.79014 \text{ days}}$

which is Two(2) cycles of TIME.

400 days would be the time in LIGHT.

I cannot say that the civilized learning system has surpassed the
teaching methods of my Grandmother who spoke no civilized language.

But then again, its easier to say, LIGHT travels at 186,000 miles
per second without knowing why.

VII.

But getting back to ODIUS or ODE and an Ancient Calendar

By Ancient calculations one ODE or expression was the TIP-IE diameter for a Calendar.

The civilized scientist put it together as follows :

ODE= a diameter for time 11 days

referenced as the LAW OF NATURE. 3 one generation of 33 days. 11 Generations= The Seasons or Tuff 363 days.

plus: Sun that stands still at the

north and south lines 2? dgyg

365; days.

Let me show you how it should have been translated.

180 1/12 atoms x 12 days= 2160(which is the first table of the 200) (tables of the WINTER TABLES: or TIME'S) (OF THE BEAST OF SATAN'S TABLES. What) (the Sioux Call THE WINTER COUNT.

You already know that 180 1/12 atoms is 23.867h05 hours in TIME

X 12 hours or 11.933702 days in TIME.

So, the Ancient figure of 2160 atoms is the same as 11.933702 days

and that one complete WINTER COUNT is 6.53b7031 years in TIME only.

One ODE= 11.933702 days 3 ODES = 35.801106 days 11 Gener' = 393.81216 days

plus 3.97798 days the stood still at the north and south

» lines equals 397.79014 days

which is Two(2) cycles of TIME. _

MDO days would be the time in LIGHT.

I cannot say that the civilized learning system has surpassed the teaching: methods of my Grandmother who spoke no civilized language.

_ But then again, its easier* to say, LICHT travels at 186,000 miles per secbnd without knowing: why.
