

knows the Months of September means SEVEN, October means EIGHT, November means NINE, and December means TEN.

What the last two months of the Julian are, civilized scholars refuse to tell me what they are. This much is known. Julian January had 31 days, February had 28 days, March 31 days, April 30 days, May 31 days, June 30 days, September 30 days, October 31 days, November 30 days, December 31 days and the last two months each had 31 days.

If an individual made the time adjustments for the overstating of Leap Year days every fourth year, which is 52 minutes and 48 seconds per Leap Year, it was a perfect Moon Calendar. For this reason the Roman's used the term IDES, which was the 15th of the Months of March, May, October and the eleventh Month on the Julian. It was the 13th. on January, February April, June, September, November, December, and the 12th. Month.

IDES of the Month was the Full Moon. The Ninth day before IDES was called:NONES which was the 5th. period out 7 daily periods for prayer and devotion that one was to review the strength of the Ancients in the area and strengthen their perpetual prayer chain against the descendants of MU and ATLANTIS which one can review in the Chapter TIME WALKER on page 154.

The last term was called;CALENDS, that was the first of the Month and the New Moon.

JANUARY was the month of the God, JANUS who was the God of Portals and beginnings and was to have two faces or be deceitful. To correct one self spiritually, FEBRUARY was the month to have a purificatory festival on the 15th. of the month.

But we must know what TIME we are in, and the Julian Calendar ended in the year 6465 and the Gregorian started in the year 1752A.D.

Scholars, Scientist, and Masons-all agree that Julius Caesar made a 90 day calendar adjustment before starting his Julian Calendar.

This reference having authority by the credentials of these Individual:

means NINE, and December means TEN.
