

One can see by the previous page and the drawing, that the Earth Orbits around the Sun on its Axis, which is referenced as Magnetic North. It is this direction that the Needle of a Compass will point to.

In my thinking, as much as our Ancetors wrote about Magnetic North and the Infinitesimal amount it changes each Solar Year, the White Man who leases land, leases land only that which can be found in a Survèy using the Magnetic North. The Indian loses land under this system. One example is the City of Salamanca, New York which is 7 times larger then the U.S.Congressional Lease. The Indian only gets paid for the original size of the lease while the oversize becomes personal property of those that have bui!t homes on it.

Next, we have True North which are Poles, and it is this point that become the Axis for the Earth to revolve one complete turn every 24 hours 57.008219 seconds. In this same period of TIME the Earth will have traveled 1,599,869.6 miles which is almost 6 times the distance to the Moon.

Now if we were to pick a TIME within these 24 hours, The North Pole would start a greater Magnetic pull by facing the Sun for 12 hours and then start to decrease this Magnetic pull and almost reach a Magnetic Repel Force because of the South Pole for the next 12 hours.

The RULE for Magnetism remains the same. Oppôsites forces attract while the same forces repel. If the North Pole is a positive force, then the energy coming from the Sun is a negative force.

The science of Magnetic Flux is what causes TIME coming from the Sun to wind, twist, and bind to bend because of Positive Flux to increase, then decrease and almost permit Negative forces to increase.

The law which can be applied here, because Ancient Indians state that each of these energys or strands or currents coming from the Sun have 12 individual powers, which have been named-(when one opens their eyes Billions of these strands maketup our vision)the theory of CURRENTS/cm²/sec which increases or decreases according to the direction, can be applied.

So, it is not a SERPENT, but TIME influenced/^{by}Positive and Negative magnetic Flux.

around the Sun on its Axis, which is referenced as Magnetic North. It is this direction that the Needle of a Compass will point to.

In my thinking, as much as our' Ancetors wrote about Magnetic North and the Infinitesimal amount it changes each Solar' Year', the White Man who leases land, leases land only that which can be found in a Survey- using the Magnetic North. The Indian loses land under this system. One example is the City of Salamanca, New York which is 7 times larger then the U.S.Congressional Lease. The Indian only gets paid for the original size of the lease while the oversize becomes personal property of those that have buinlt homes on it.

Next, we have True North which are Poles, and it is this point that become the Axis for the Earth to revolve one complete turn every Zh hours 08219 seconds. In this same period of TIME. the Earth will have travel 1,599,869.6 miles which is almost 6 times the distance to the Moon.

w if we were to pick a TIM? within these 2b hours, The North Pole would stent a greater Magnetic pull by facing the Sun for 12 hours and then start to decrease this Magnetic Pull and almost reach a Negnetic Repel Force because of the South Pole for the next 12 hours.

The HELE for Magnetism remains the same. Opposites forces attract while the same forces repel. If the North Pole is a positive force, then the energy coming from the Sun is a negative force.

The science of Magnetic Flux is what causes TIME coming from the Sun to wind, twist, and bind to bend because of Positive Flux to increase, then decrease and almost permit Negative forces to increase.

The law which can be applied here, because Ancient Indians state that each of these energys or strands or currents coming from the Sun have 12 individual powers, which have been na_med-(when one opens their eyes Billions of these strands maketup our vision)the theory of CURRENTS/cm/sec which increases or decreases according to the direction, can be applied.
