

ZS

The drawing shows the entire Sun with the dark center. Outside of this are also lines showing 12 powers, which represent the opposite powers of the center powers.

The grey outside of these 12 powers, which also cannot be counted, represents the completion of the 12 powers of TIME or what the civilized call: LIGHT. This grey area represents 16,000.5 miles deep from the 864,000 miles diameter of the Sun.

k ZS' The drawing shows the entire Sun with the dark center. Outside of this

the center' powers. \_ \_

The grey outside of these \_12 Powers , which also cannot be counted,

of the 12 powers of TIME or what the civilized Call: LIGHT. This grey area represents 16,000.5 miles deep frgm the 86b,000 miles diameter of the Sun.
