

Next, Antiquity and Anthropology Scientist have given almost every idea one could muster up on why Indians of the America's only had a calendar of only 360 days a year. It was concluded that a 360 day year wasn't bad for some dumb savages

Let put it over here ----- 3 6 0 d a y s

The Indian had the day broken down into 181 parts
 24 hours divide by 181 = .13259669 times 60=
 7.9558014 minutes times 181=1440.0001 minutes
 divide by 60=24.000002 hours.

7.9558014 min. times 365.240833(Yr)=2905.7835 min.
 2905.7835 divide by 60 divide by 24= 2.0179052 dys.
 (The amount of time it takes light from the Sun
 to reach Earth for one year.) We call this LIGHT

The Earth travels in Orbit at 18.51693 m.p.s
 It takes this light 477.34808 sec times 18.51693=
 8839.021 miles time 365.240833=3,228,371.4 miles
 to takes light to reach Earth in one year.
 8839.021 times 180 times 365.240833=581,106,850
 subtract from 584,335,740(Earth's circumference)
 3,228,890 divide 365.240833=8840.4409 divide by
 8839.021= 1.0001606 dys
 We'll call this time lost through the VELOCITY
 of the Earth.

The next part is Dimensional change or man's total
 Imaginary concept to the speed of LIGHT
 8.3333 minutes comes to- 2.1136538 dys

22.665 second is the deference between the Ancients
 and the civilized calculations for the speed of LIGHT .0958123 days

Now, 10% of 22.665 second would or could be accounted
 for, but it comes to .1388388% or 3.146784 second
 per-day comes to- .0133025 days
 Totals 365.24083 days

Time lost through LIGHT traveling is 2.0179052 days
 Time lost through VELOCITY of the
 Earth traveling around the Sun. 1.0001606 days
 Time lost through the DIMENSIONAL
 CHANGE 2.2227675 days
 5.2408333 days

TIME traveled a distance in 360 days that it took
 LIGHT 365.240833 days to travel the same distance.

We'll call this: MUSA'S ALPHA HARMONIC.

We now have the equations to work out an old Ancient TIME THEORY.

THE PRESENT minus THE PAST equals THE FUTURE

every idea one could muster up on why Indians of the America's only had a calendar of only 360 days a year. It was concluded that a 360 day year wasn't bad for some dumb savages

$7 \sim 9553 \text{ÜIL} \gg \text{min. times min. } 2905.7835 \text{ divide divide by } 2.0179052 \text{ dys. (The amount of time it takes light from the Sun to reach Earth for one year'.)}$ We call this LIGHT

1.0001606 dys

The next part is Dimensional change or man's total

Imaginary concept to the speed of LIGHT

8.3133 minutes comes to- $_ 2.1136538 \text{ dys}$

22.665 second is the deference between the Ancients . and the civilized calculations for the speed of LIGHT .0958123 days

Now, 10% of 22.665 second would or could be accounted

Time lost through LIGHT traveling is 2.0179052 days Time lost through VELOCITY of the

Earth traveling around the Sun. 1.0001606 days Time lost through the DIMENSIONAL CHANGE . 2.2227675 days

5.2408333 daífs

TIME traveled a distance in 360 days that it took LIGHT 365.2h0833 days to travel the same distance.

We'll -Call this: MUSA'S ALPHA HARMONIC.

~ We now have the equations to work out an old Ancient TIME' THEORY.

THE PRESENT minus THE PAST equals THE FUTURE
