

Now there are references presented from the viewpoint of an Ancient which I know will give the civilized scientific community reasons to jump and shout and go so far as to give a kind word for Einstein.

"IF SUCH A THING WAS POSSIBLE, WHICH IS NOT SCIENTIFICALLY POSSIBLE, IF IT WAS, TIME WOULD HAVE TO HAVE A TWIN RUNNING PARALLEL OR PERPENDICULAR."

TIME does have a twin. The DIMENSIONAL change and theory lays within the 22.665 seconds, which changes it from Positive to Negative TIME.

Antiquist and Anthropologist are still making up stories which is to explain why Ancient Indians wrote about the Planet VENUS.

Usually a separate time to Eat human steak, like the Early Civilized christians who ate Indian Human Steak blessed by the local Rabbi in the late 1700's and early 1800's.

SIMPLE! They knew that the Planet VENUS rotated the opposite direction from other Planets in our Solar System and should this Planet become in-lined between the Earth and Sun, calculations would be in a dimensional change where everyone believed LIGHT traveled at 186,000 miles per second, which would be incorrect. To overcome the problem with VENUS, ancients knew that 1,000 or 2,000 ancient years or atoms would always calculate to a dimensional change. But 3,000 did not.

Why did Indians write about VENUS? They had to! Because it influenced the reason for the dimensional change.

Lets go back to the theory of the Ancients. That part on how TIME undergoes a change and becomes LIGHT.

Condition your mind to Part c. Lets first present how the civilized scientific mind looks at TIME and LIGHT.

Now there are references presented from the viewpoint of an ancient which I know will give the civilized scientific community reasons to jump and shout and go so far as to give a kind word for Stein.

TIME does have twin. The DIMENSIONAL change and theory lays within the 22.665 seconds, which [changes it from Positive to Negative TIME.
