

To state that it all was a terrible mistake and should now be corrected would not benefit the Indian for many reasons because it will never change and the proof lays in the beginning. It never was a mistake because it was a government opinion that caused a government executive order, to assure the white dominate society, that the American Indian would not be part of the American Society. To precise to be a mistake.

But what about written languages? Did the Indian have any? I personally knew one and after looking into White Antiquity and Anthropology records of the civilized scientist, they have always known the Indian had two highly developed ones. These scientist can write both of them but they have been unable to match the written language to the spoken language. The problem! How did ten different tribes speaking different languages write the same written language?

So the subject will be INDIAN EDUCATION. Not the white kind, but Indian. Ancient Indian that will appear to be complicated and foreign.

From this you can make a personal evaluation on how far the white man system has taken you from your ancient tribal educational system.

What you are about to learn is old, very old. The common man on the street calls it mythology, but it is studied in the most sophisticated Institutions in the world, by Men and Women of Letters with unlimited resources trying to decode only one scientific fact.

These Men and Women of Letters know:

THE AMERICAN INDIAN AS A TRIBAL UNIT, HAS SURVIVED THE LAST 5 GREAT ICE AGES, LIVING IN PEACE WITH THE DINOSAURS, WITH THE SAME SONG AND DANCES, SAME KNOWLEDGE OF MEDICINES, SAME KNOWLEDGES OF FRUITS AND VEGETABLES AND HOW TO CURE THEM AND COOKING WITH FIRE, AND THE SAME BODY STRUCTURE AS THE INDIANS FOUND ON TRIBAL RESERVATIONS TODAY SO THEY CANNOT BE INCLUDED IN DARWIN'S THEORY OF EVOLUTION.

The scientific finds and evidence on this, is in quantities that
