

From Zero(0) to 18.6 miles per second, is excused because of the velocity of Earth, but up to the speed of 68,820 m.p.s. is not considered light because it cannot be seen.

From 68,820 m.p.s. to 119,040 m.p.s which represents 27% of the entire theory on the speed of light.

From 119,040 to 169,260 m.p.s. is Ultraviolet, not considered light.

From 169,260 to 186,000 m.p.s. is unknown, so-

What is the SPEED OF LIGHT when .639% of the Theory is not considered LIGHT?

1,860 miles per second

miles per Second È À 'Velocity of Earth in Orbit

18.6

- 18.6

Ä 1.86 miles per second

11 Í 982.09 Peet per Second

`98.208 feet per second

19.8208 feet per second

E 11784 feet per second

Tribal teachings state that it is greater distance from -O to +

_ 5, .011 1734 Inches per second

From Zero(O) to 18.6 miles per second, is excused because of the velocity of Earth, inuff up tó the Speed of 68,820 is not considered light because it cannot be seen.

From 68,820 m.p.s. to 119,040 m.p.s which represents N25 of the entire theory on the speed of light.

From 119,040 to 169,260 m.p.s. is Ultraviolet, not considered light, From 169,260 to 186,000 m.p.s. is unlmoxm, so

What is the SPEED OF LÍGHT when of the Theory is not considered LIGHT?

light

68,820 begining of Color
