

Yet the birth of this phrase comes from the complete break-down of the original profession which has the responsibility to represent an individual in a very exacting science called LAW!

Nothing could be further from the truth if one considered PARA-LEGAL second-rate to the original because, it is one step above and cannot operate legally till the original profession becomes limited by a set of circumstances where legal representation for a client is fraud violating the profession's basic moral and ethic codes as well as the United States Constitutional right for the profession to exist.

Universities across this country present a course in PARA-LEGAL by their law departments, to students who will be limited to assisting the original profession only, which is not true PARA-LEGAL.

These courses have one purpose to serve as an academic standard. To conceal crimes that have been committed in which the original profession acted as the prosecutor to convict the innocent and permitted the guilty to go free from prosecution. As long as the convicted innocent does not by proper legal form, complain to the trial judge that his legal representation is violating his constitutional right to able legal assistance, this convicted individual is bound by the acts or the lack of them of his legal representation. *Henry v. Mississippi*, 379 US.451-452; cf. *Brookhart v. Janis*, 384 US.1(1966).

PARA-LEGAL gave birth by Inmates in the Federal Penal Systems which is not or not to be considered "a jail-house lawyer."

The original profession can duplicate everything the "jail-house lawyer" does, but, cannot duplicate the duties of the PARA-LEGAL.

The duties of the PARA-LEGAL were first formed in Federal prisons, when it was discovered that Defense Attorneys representing clients, got convictions for the court, knowing their clients were innocent of the convictions, creating what we know today as "Political Prisoners."
