

Now to keep Antiquist and Anthropologist from being left out in the cold, 36,000 converting to Julius Caesar's Antiquity find, which now becomes 3,000 years divide by 15.08333 = 198.89507 days that is one(1) time cycle without light.

There are 12 such TIME CYCLES in one(1) WINTER COUNT.

Two(2) TIME CYCLES make up the 12 Rules of Prophecy and the Tribal count of the Six(6) days of the CREATOR and CREATION.

Two(2) TIME CYCLES are used in a tribal calendar showing the twelve Rules of Prophecy, 12 Moon cycles with each 4 ritual times, the period of the TIME WALKER, the three tribal quite days, the 12 Mundane and signs of the Zodiac, and with the remainder of the FIRST-BORN WOMAN'S EQUATION, which has been identified by the Dakota as WYNONA.

Historically, it was used by all the CAESARS, and was named that is still known today as- THE GREAT NERO.

FOOD FOR THOUGHT!

As stated, American Indian Legends tell traditionally, that our past Ancestors travelled through 9 Solar Systems to get here and they brought with them an element needed for correct Human Cycles.

According to tribal law, one is not to spend more than 8 years out in space, These are Birthday years, so no one can stay in space longer than 2,880 days.

Ancient American Indians calculated that these ships travelled at a equation or fixed velocity to the speed of time.

This fixed velocity times the restricted time that can be spent in space divide by the speed of light, divide by seconds, minutes, and hours of the civilized for one light year, equals= 14.1242717 light years away that these ancient American Indians came from, so traditionally, the distance to the next Planet with Life that is identical to Earth is only 14.1242717 light years away.
