

Lets begin with one of the 181 units and figure out how much time this would be.

24 hours times 60= 1440 minutes divide by 181 units = 7.9558011 minutes

93million miles the Earth is from the Sun, divide by 7.9558011or
477.348066 seconds = 194,826.389 miles per second
is the speed of light.

Now this is a big difference of 8826.389 miles per second.

The next part to explain, will not agree with what has been written or lectured on by Antiquist or Anthropologist, but this too has been omitted from traditonal stories told to researchers.

The subject is the Planet VENUS, which is called by a Tribal Clan Name by American Indians and we do not bow down and worship this Planet as some kind of Deity.

But in our sciences because this Planet rotates differently than the others in our Solar System, it causes the impulses or strands of Time to undergo a dimensional change, which does have a theorum on fixed velocity.

To have a conclusion to this fixed velocity, legends state that anything that comes into contact of this dimensional change, undergoes an aging process.

TIME DIMENSIONAL CHANGE is the aging process of an opposing force that can only be overcome, by the synchronizing of human rituals handed down from the CREATOR, GREAT SPIRIT.

What kind of theorum does this TIME DIMENSIONAL CHANGE or AGING PROCESS have on the speed of light?

It starts at a quantum speed of 1.0208831 seconds after leaving VENUS and arriving on Earth.

The fixed velocity can now be calculated to find its influence on the speed of light.

93million miles(radius) times 2, = 186million miles(Diameter) times pi = 584,335,740 miles(circumference of Earth Orbit).
584,335,740 miles divide by time for one complete orbit(365.242198)
= 18.5168778 miles per second the Earth is traveling in Orbit.
477.348066 seconds it takes the light of the Sun to appear to the human eye, TIMES 18.5168778 m.p.s. the Earth is traveling in Orbit = 8838.99581 miles.
194,826.389 -8838.99581 = 185,987.393 miles per second is the Speed of Light.

this would be.

24 hours times 60= 1440 minutes divide by units fr 7.9558011 minutes

93million miles the Earth is from the Sun, divide by 7.9558011014⁷⁷/7.348066 seconds = 194,826.38@ miles per Second is the speed of light.

Now this is a big difference of 8826.389 miles per second.

The next part to explain, will not agree with what has' been written or lectured on by Antiquist or Anthropologist, but this too has been omitted from traditonal stories told to researchers.

The subject is the Planet VENUS, which is Called by a Tribal Clan Name by American Indians and we do not bow down and worship this Planet as some kind of Deity. '

But in our sciences because this Planet rotates differently than the others in our Solar System, it Causes the impulses or strands of Time to undergo a dimensional change, which does have a theorem on fixed velocity.

To have a conclusion to this fixed velocity, legends state that anything that comes into Contact of this dimensional change, undergoes an aging process.

TIME DIMENSION]-XL CHANGE is the aging process of an opposing force that can only be overcome, by the synchronizing of human rituals handed ÖOWI1 frO1`n the CREATOR, GREAT SPIRIT.

What kind of theorem _does this TIME DIMENSIONAL CHANGE or AGING PROCESS have on the speed of light?

It Starts at a quantum speed of 1.0208831 Seconds after leaving VENUS and arriving on Earth.

The fixed velocity can new be calculated to find its influence on the speed of light. «

93million miles(radius) times 2.,; 18ömillion miles(Diameter) times pi = 584,335,740 mileS(C:ircumference of Earth Orbit) .

584,335,740 miles divide by time for one complete orbit(365.24219B) = 18.51687/B miles per second the Earth is traveling in Orbit.

477.3453066 seconds it takes the light of the Sun to appear to

the human eye, TIMES 18.516877B m.p.s. the Earth is traveling in Orbit = 8838.€-39581 miles.

194,826.389 -B838.9958f = 185,987.393 miles per second is the Speed of Light.
