

to be explained by a psychologist. They can be recorded on Instruments. They do not require a living observer."

Yet in this same publication, page 48 and I quote"
".....If you had sufficiently accurate instruments(of course no such instruments exist)you could clock the time it takes this light beam to traverse the V-shaped path. By dividing the length of the path by the time, you obtain the speed of light."

In the book, THE MEANING OF RELATIVITY, 5th. Edition, Einstein, pp.165-166 Albert Einstein- excuses Euclidean and Cartesian theorems as not complete creating future arguments for anyone to challenge his theory.

- "C. It is conceivable that field theory permits one to understand the atomistic and quantum structures of reality?
Almost everybody will answer this question with "no.".....
- D. One can give good reasons why reality cannot at all be represented by a continuous field. From the quantum phenomena it appears to follow with certainty that a finite system of finite energy can be completely described by a finite set of numbers(quantum numbers). This does not seem to be in accordance with a continuum theory, and must lead to an attempt to find a purely algebraic theory for the description of reality. But nobody knows how to obtain the basis of such a theory."

There is no reference that could be found on the theory to the speed of light by the civilized white man.

In fact I know less about this theorem after: I started to read this material.

I was looking for the theory, in a wild hope I could check it against what had been taught me as a small boy before I could speak the English language.

What must be done, is relate what had been taught to me by my ancient Indian Grandmother on how to put together the theory on the speed of light that Antiquity scholars have translated from American Indian Documents as THE MANIFESTATION OF TIME.

In Albert Einstein's THE THEORY OF RELATIVITY, i was looking for the Equation or theory on the Speed of Light which would have put to sleep many traditional stories presently classified as MYTHOLOGY, into the Catagory of PURE SCIENCE

There is no deserted, solitary, and isolated feeling known in having to present American Ancient Tribal Teachings on the theory to the speed of light, which will be compared to Einstein's THEORY OF RELATIVITY, that is not a legitimate theory which is used and quoted by the civilized sceintific communities of the world.

Yet in this same publication, page 48 and I quote " If you had sufficiently accurate instruments (of course no such instruments exist) you could clock the time it takes this light beam to traverse the V-shaped path. By dividing the length of the path by the time, you obtain the speed of light."
