

CIVILIZATION

2;

a civilized and a tribal civilization, which I know you do not have, and (Two) We are both seekers of TRUTH which can be interpreted and classified as, there are many facts believed and practiced by the peoples of the world, that are not always the TRUTH. So FACTS and TRUTH are two separate entities.

How each of us arrived at these truths, which I will show was done in a different manner but concluded at the same exact spot, makes us competent that sets the table for us to exchange our findings.

How I arrived at certain TRUTHS, that had to be separated from facts is quite different from the method employed by scholars, who could state that the method is not open to everyone and not caring to challenge it.

No one will dispute the method because it produces absolute TRUTHS by challenging the very existence of an entity such a nation or country in which the full spectrum of living life was used to find them.

To test any TRUTH, with your human life as the penalty for any errors that could be made, and win any and all challenges-makes one uncompromising, aloof, and dogmatic that conflicts with American Indian traditions to always keeping an open mind. So from the intellectual concept or insight I come from, my TRUTHS are not open to debate because I've paid for each by ^{being} hunted and shot at by real live bullets where there was no domestic or International law to provide a shelter, so they were paid for in full by the literal blood of my body. The beginning TRUTH to be established that brought me to this time and place, the synchronization of now, I know what it is to be shot at by Howie Gunboats that were fixed with Laser weapons that disintegrated large trees in a split second over 16 years ago. These are weapons you have not heard of yet which gives some idea the effort that was made so some TRUTHS would not be established.
