

From this came the Song or dance or Chant, which represents the unknown expression that is to synchronize with the Universe.

The Indian must also live by the seasons like the Animals, Birds, and Fish but must do the Song or Dance or Chant by appointed times which must match the timing of the Universe.

But there is nothing or anything on Earth, that synchronizes with the Universe. Nor is there a reference point or event in any type or form that references that the Universe is subject to a cycle that is predictable or programable. It is because of this scientific fact that makes the rituals of Song, dance, and chants done by the American Indian as some type of religious Hocus-pocus omitting cause and effect.

If one cares to get into the two schools of thought on the Archeology finds of Peru called: THE GATE OF THE MOON, which one side believes that the Moon was a creation of a Phenomenon and Mystery like the rest of our Solar System; while the other side believes this Satellite was placed in orbit around the Earth by the Ancient Indian Scientist because of a telescope found at the find, only 10 inches long, which has a greater magnifying power than any telescope built today.

No matter what your debate is and what side you believe is correct, it is still the only object in our solar system that can be matched to the time table of the Universe.

So, for the American Indian to have a Moon Calendar, it cannot be construed to be some Pagan Ritual belief, but a sound scientific fact that cannot be disputed. REMEMBER! Julius Caesar's Julian Calendar was created from an Ancient Calendar called: THE CALI YUG which was a Moon Calendar. The Julian is everybit---like the Gregorian Calendar with the same number of days in one year and the same method for Leap Year days, except the Julian did not have the months of July and August
