

Medical profession wants everybody to get rid of the "cholesterol" in their body. Cholesterol is a Fat-soluble, solid alcohol, found in the brain, blood, and nerve tissues which is closely related to the digestive system of our body.

One could tie these Campaigns directly to the alleged "GREENHOUSE EFFECT" where the world scientific community assumes that the present-day pollution will cause the Sun to heat the Planet Earth to unbelievable temperatures.

"Cholesterol" among its many functions, with having a main one, is to take the energies of our body, convert it to still another which helps to keep your body warm in cold weather.

We now have the future and it's outcome. The "GREENHOUSE EFFECT" will cause the Earth's temperature to raise or rise 40 to 50 degrees above normal that will cause a breakdown of the cholesterol in the human body as waste, causing Gas in the muscle tissues. To prevent this, populations throughout the world will have to rid their bodies of any cholesterol.

But there will be a side-effect that no one has considered.

The human body will no longer be able to heat itself so everyone will have to monitor their temperature so that it will not fall below 88 deg.F.

If this will become the future, then there is two directions the genetics of the human body can go. To either become dependant on self-heating clothing at a great cost, or, become as the Anthropology "GOLDEN MAN" find which is believed to be the CRO-MAGNON or NEANDERTHAL MAN link, where a young Sioux Boy attending the University of Albuquerque in 1984, was told by the SMITHSONIAN INSTITUTE- that all scientific evidences and findings to this "link" was no longer open to the public.

AGAIN!!! This is not what American Indian legends state will be the outcome of the "GREENHOUSE EFFECT."

This legend has been compared from over 25 Indian tribes on over 100 Indian reservations in Mexico, United States, Canada, Labrador, Newfoundland and Nova Scotia, including the ancients of Iceland, and Greenland;

FIRST, when babies will be diseased and deformed in a woman's womb before birth, and

SECOND, when countries will have no way to turn for the safety or help of their nation and peoples who face their country collapsing;

shortly after, there will be one year or 365 days of straight winter.
