

D.S

and to able to write and speak it which caused Indian tribes to modified the native languages that omitted many expressions from this unknown secret language, just to stay alive. They made it known to me that this is still known with some still able to write it.

In the archives of New Mexico in Santa Fe, Pueblo Indians have always been permitted to review treaties every year, written in an unknown language. Now many of these tribal members know Ancient and modern spanish, Medieval and modern Latin, and this alleged unknown language. But the treaties in the archives of New Mexico and the language written in were unknown to them.

This made the fact or truth, that these treaties had been retranslated into another language from its original. Once the state of New Mexico found out these Indians knew what language these treaties were written in, the period of time and the country that rewrote them, these references became "restricted references" as of 1988.

Now the legends of and told by Indian elders has truth to them and no longer to be treated as mythology, but part of world history because civilized historians have only blank spaces for world history.

Now we can go back to the beginning of my talk. WHAT IS AN AMERICAN INDIAN DOING IN A PLACE WHERE ONLY THE SUBJECT OF THE EGYPTIAN AND HIS CULTURE AND LIFESTYLE IS REVIEWED.?

I'm here state that the Egyptian as a nation, culture, and lifestyle did not cease in 300 a.d. as many believe but continued through February 1491A.D.

I can take the old Egyptain language and give you the modified one all the way to the modern one of today.
