There are 13 signs of the Zodiac on the outer circle.

It is the Intercircle which you may have guessed by now, shows 365 days with the months of the Gregorian Calendar plus a dark patch making a total of 400 days. This Intercircle moves and it is the key to where the calendar dates are to be next to the 13 Zodiac signs.

The Intercircle has a cycle which is perpetual and many in the past have tryed to start or end within the cycle, to confuse those who were trying to piece history and Astrology back together again.

The Cuter and Inter Circles represent an Ancient Calendar of LIGHT and not TIME which is something entirely different. Something like what Julius Caesar worked on to create the Julian Calendar.

One can see that it has a cycle of 70 years, totally alot different then all those books written by authors who misunderstood Indians, or were told what to write. It is the Intercírcle which you may have guessed by now, shows 365 days with the months of the Gregorian Calendar plus a dark patch making a total of $\[\mathcal{E} POO \]$ days. This Intercírcle moves and it is the key to where the calendar dates are to be next to the 13 Zodiac signs. past have tryed to start
