

ONE DAY

TO FORMULATE A WORD OR PHRASE OR EVEN A SET OF PHRASES THAT WOULD EXPLAIN HOW THE AMERICAN INDIAN IS INFLUENCED BY GENETIC TIME, IS MET WITH SOMEWHAT OF A CHALLENGE BECAUSE THE OTHER CULTURE(WHITE) DOES NOT HAVE A SCIENCE THAT DEALS WITH GENETICS HAVING A COMMUNICATION SYSTEM, LET ALONE HAVING A HUMAN BEING UNDERSTANDING THE SYSTEM. THE WHITE CULTURE HAS AT MOST, GENETICS HAVING A MEMORY. NOTHING MORE. AMERICAN INDIANS CANNOT EXPLAIN THIS COMMUNICATION SYSTEM, ONLY THAT THEY KNOW WHEN TO RESPOND TO IT. THAT THIS INTELLIGENCE SPEAKS TO THE HUMAN MIND IN A LANGUAGE THAT THE SOUNDS HAVE NOT BEEN FORMULATED TO MAKE IT A LANGUAGE THAT COULD BE WRITTEN DOWN SO THAT EVERYONE COULD LEARN IT AND THEN SPEAK ON IT INTELLECTUALLY

WITH THAT IN MIND, THE ONLY AVENUE LEFT WOULD BE TO EXPLAIN WHY AMERICAN INDIANS RESPOND TO IT AND WHY THEY GOVERN THEIR LIVES BY WHAT IS KNOWN AS INDIAN TIME.

TO BEGIN, WE WILL USE ASSOCIATIONS WHICH SHOULD BUILD A BRIDGE OF UNDERSTANDING. THE WHITE CULTURE HAS 86,400 SECONDS OR 1440 MINUTES OR 24 HOURS THAT MAKE UP ONE COMPLETE DAY. THE AMERICAN INDIAN HAS A LIKE SYSTEM WITH ONE SMALL EXCEPTION. UNDER CERTAIN CIRCUMSTANCES, THEIR SECONDS OR MINUTES OR HOURS IS COMPUTED WITHOUT LIGHT, WHILE OTHER CONDITIONS REQUIRE TIME TO BE COMPUTED WITH LIGHT. THE REASON FOR THIS, IS THAT THEY HAD A SCIENCE THAT TEACHES A THEORY THAT IS BASED ON LIGHT BEING A BY-PRODUCT OF TIME. IN THE WHITE CULTURE-LIGHT IS TIME OR TIME IS LIGHT. TO THE INDIAN AND HIS SCIENCES, THEY ARE TWO SEPARATE SCIENCES.

(WITH LIGHT) 2172 WOULD BE THE SECONDS, DIVIDE BY 12=181 MINUTES
DIVIDE BY 12=15.08333 HOURS FOR ONE COMPLETE DAY. NOW WE HAVE TO FIND NUMBERS THAT EACH WOULD UNDERSTAND. 24HOURS(WHITE) DIVIDE BY 15.08333(INDIAN)
=(WHITE)1HR. 35MIN. 28.18SEC. TIMES 15.08333=24 HOURS.

THE MOST INTERESTING NUMBERING SYSTEM USED BY AMERICAN INDIANS, IS, WHAT YOU WOULD IDENTIFY TO THE MINUTE SYSTEM, WHICH IS 181 UNITS FOR ONE COMPLETE DAY.

THE 181 UNITS IS THOUGHT OF AS BEING ONE/HALF OF A YEAR. THIS TIMES 2= 362 DAYS. BUT THIS IS 3 DAYS SHORT OF A 365 DAY YEAR. HOW DOES THE AMERICAN INDIAN COMPENSATE FOR THE 3 DAYS NEEDED, PLUS THE LEAP YEAR PROBLEM? IN THE OLDEN DAYS WHICH CAN STILL BE FOUND AMONG THE TEWA INDIANS IN THE SOUTHWEST, THERE IS, WHAT IS CALLED THE QUIET DAYS. 3 DAYS IN WHICH TRIBAL MEMBERS ARE TO DO NO WORK OR BUILDING

THESE 3 DAYS ARE TO BE SPENT REDEDICATING ONESELF TO THE CREATOR, GREAT SPIRIT. THE READING OF THE GREAT LAW, WHICH IS THE BOOK OF DEUTERONOMY THAT WOULD BE FOUND IN THE OLD COPTIC BIBLE OF 451AD.

THIS WOULD BE $181 \times 3 = 543$ UNITS PER YEAR. $543 \times 4 = 2172$ UNITS FOR THE LEAP YEAR, WHICH NOW TELLS THE TRIBE TO HOLD A CORN DANCE FOR THE FIRST-BORN(GIRLS), AND THE FUTURE(TIME)DANCE FOR THE TIMEWALKERS(BOYS).

THIS DANCE DAY BECOMES THE ADDITIONAL DAY NEEDED FOR LEAP YEAR. REMEMBER THE 2172 UNITS? THE 181 UNITS PER DAY WAS TIME WITH LIGHT. LET'S TAKE A LOOK AT 180 UNITS PER DAY, WHICH IS TIME WITHOUT LIGHT.

THE MOST INTERESTING NUMBERING SYSTEM USED BY AMERICAN INDIANS, IS, WHAT YOU WOULD IDENTIFY TO THE MINUTE SYSTEM, WHICH IS 181 UNITS FOR ONE DAY
