

I stated at the beginning, to have any kind of understanding to the Tables of the WINTER COUNT, one had to try and understand the Indians and their thinking to their Physic or Scientific Laws. He lived a basic life that included in common knowledge, that all time undergoes a change and becomes light and then darkness. He knew this law up and down, backwards and forwards, in and out. It was a subject that everyone knew and to not know it, identified you as a stranger.

This scientific or physic law is a Universal law and even if a person came from another solar system, it could not be disputed because it was the system used to get to this Planet Earth.

#### THE UNIVERSAL LAW

What scientific law or physic theory, that deals in time which is made up of 181 parts, constructs TIME as an arrangement to PARALLAX, VELOCITY, CONTINUANCE, TRANSMUTES an HYPOTHESIS?

It deals with the SUN which the civilized systems establishes Zero in TIME, but the ANCIENTS state it is for any SUN but it is being applied to our solar system. The ANCIENTS were able to construct a TIME VEHICLE called a SERPENT from these parts which many would consider it a PHENOMENON because of the present HYPOTHESIS to TIME.

Civilized Antiquity Scientist, translating Ancient writtings ran across THE FORMULA, THE LAWS, and a drawing OF THE TIME SERPENT winding and coiling form the SUN to EARTH. What this mathematical phenomenon did conclude, Ancients had drawn the exact journey of time through space and knew exactly the cycle of this drawing.

This LAW or FORMULA or EQUATION is a simple calculation and can be applied to any SUN in the Universe. Every Mathematician or Scientist knows it in part, and cannot dispute it.

In a lay-man's-language, it can be applied in this manner having a base to begin.
