

The Young Indian Child tries to understand the question but must give it thought. Living several hundred imaginary people in ~~one~~ ^{thought every} day, just to keep from burning up, the question has no relative base to start from.

These Indian Elders spent the rest of the day, finding the like and dislikes of this child, and then send him or her home.

The next meeting the child has not found a base to work from and is expecting the same question.

The Elders sit and ask a question of the child.

WHAT IS THE FIRST QUESTION YOU ASK YOUR MOTHER AND FATHER WHEN YOU WAKE UP IN THE MORNING?

The child is startled and surprise because the answer is easy.

WHAT PART OF THE DAY IS IT? answers the child!

"GOOD!" replies the Elders, you have answered both questions.

The beginning teachings of the American Indian culture starts with TIME. It must begin at this time in this young child's life because it is a culture in which TIME is a science that is an Entity by itself.

Now this Ancient science has been hidden by the Elite civilized of the world from their subjects so that only a few may know the truth.

The formula, what little that has been translated by the civilized is hidden in an Old Ancient word expression that means "Hidden."

There are thousands upon thousands all over the world, religious and metaphysical Occults (taken from the Latin also meaning-cover over, hide) groups; Free-Lance Antiquity Scientist; and, Interested Religious groups all claiming to have found the reason or the object of this Ancient Science of TIME. Only the object has so many varieties that no one can begin to isolate the type of varieties that should be researched. With this problem, leaders of this religious concept, used the object to capture sound(s), establish mathematical equations to Side Parallelograms, and isolate the streams of a by-product of TIME called: LIGHT.
