

C H A M ' K U

If one was to ask an Indian of the Dakota nations today, the meaning of this word, their explanation would be a simple sound-W O O D !

I can say with authority, that any Indian Language when spoken correctly and comprehended in the original logic system, cannot relate one Indian word for one english word. If all Ancient cultures were handed down from the CREATOR, GREAT SPIRIT, then it has to be the same all over the world.

If my people, the Dakota people; related the true meaning of this word it would explain why we have endangered species of Animals, Birds, and Plant Life.

Let me tell of an Ancient Indian Legend that is still told by some traditional Medicine people today. Antiquist tell only of the alleged mythology and overlook pure scientific facts.

"In the days of The Great Migration, people who have not followed the laws of the CREATOR, GREAT SPIRIT will by the Red Wind, become the Black Oil and Black Rocks that burn. It is the Red Wind that will cause the trees to burn and the smoke shall reach the small heights that the CREATOR, GREAT SPIRIT will know what new Animals and Plants and Birds and Sea Life will be Created for the New World that is to come."

This legend has been studied by the elite of the world from all old Ancient cultures of the world and it is believed they have a formula that would provide select Human Races, select Animal Life and Sea Life, and, Planet Life that will provide select estates. *THE BALANCE OF NATURE IS COMPLETELY OMITTED*

So, if they can endanger certain species and remove them from the Earth, when the global catastrophe that happens that causes an Ice Age (what Indians call a Great Migration) then the survivors of this Elite will create generations that are to inherit this select lifestyle, in this new world.

We know that the American Indian Buffalo and Two-Breathing Spouted Whales, The Eagle, certain Salmon Fish, and certain Oak and Willow trees must be destroyed along with certain races of people who use logic
